Education

2025–27*	**M.S.**, Mathematics, Lahore University of Management Sciences (IMM-LUMS) (3.72/4.00)†
2021–25	**B.S** Mathematics, National University of Science and Technology (NUST) (3.94/4.00)

Research Experience

2026–27	Masters Thesis: We are studying the existence of higher dimensional octonionic projective spaces. Currently, as literature review, We are in the phase of reviewing exotic Lie groups and their constructions.
2024–25	Final Year Project: In this, we reviewed some areas of the proof of the poincare conjecture. Areas such as Ricci flow, finite time blow-up for solutions, and surgery were in focus.

Other Experience

2026	Summer internship at ICTP and SMI, Italy: Took mini-courses on Spectral theory, Convex analysis and Dynamical systems at ICTP. Attended summer schools on Algebraic and Differential geometry at University of Perugia.

Talks

Feb-2026	The Minkowski metric and its consequences on the usual Euclidean geometry (LUMS)
Jul-2026	Application of Spectral sequences to Hopf fibration over S^2 (ICTP)
Oct-2026	Schur's Lemma in Representation Theory and its manifestations in machine learning (LUMS)

*Expected.
†Currently.

Teaching

2026 Teaching Assistant, Multivariable Calculus (LUMS)
